Exemple 2

Problème : $a \approx b \land b \approx c \land g(f(a), b) \approx g(f(c), a) \land f(a) \not\approx b$

initialisation	${a}, {b}, {c}, {f(a)}, {f(c)}, {g(f(a), b)}, {g(f(c), a)}$
$a \approx b$	$\{a,b\},\ \{c\},\ \{f(a)\},\ \{f(c)\},\ \{g(f(a),b)\}\ \{g(f(c),a)\}$
$b \approx c$	${a,b,c}, {f(a)}, {f(c)}, {g(f(a),b)} {g(f(c),a)}$
$g(f(a),b)\approx g(f(c),a)$	${a,b,c}, {f(a)}, {f(c)}, {g(f(a),b),g(f(c),a)}$
congruence $f(a)$ et $f(c)$	${a,b,c}, {f(a),f(c)}, {g(f(a),b),g(f(c),a)}$

Résultat : sat car class $(f(a)) \neq class(b)$
